

Make Your Own Sequences Activity - Flower Pattern 1

A fun, interactive activity sheet for practice completing sequences.

1. Use the dotted lines as guides to cut out the squares below and the bar at the bottom.

2. The parent or teacher can assemble the cut out squares into creative sequences on the bar while leaving one or more squares blank. The student can then fill in the blanks with the appropriate cut out images. Reverse roles and have the student create the sequences!
